# A global shift to ISO 20022

June 2024  
ISO 20022  
Community  
Readiness Deck

## Meeting the G20 targets

The G20 has outlined a number of goals to enhance the speed, cost, transparency, choice and access of cross-border payments by 2027.

## Global adoption in domestic markets

ISO 20022 has been adopted by market infrastructures in 70+ countries replacing domestic or legacy formats.

## Delivering next gen payments

ISO 20022 is the key standard in next gen payment schemes, including instant payments, move to 24x7, supporting open banking over APIs, and others.

## Cross border payments on the move

March 2023 is the start of co-existence period started with ISO 20022 and MT as standard for cross-border payments and reporting, running until November 2025.

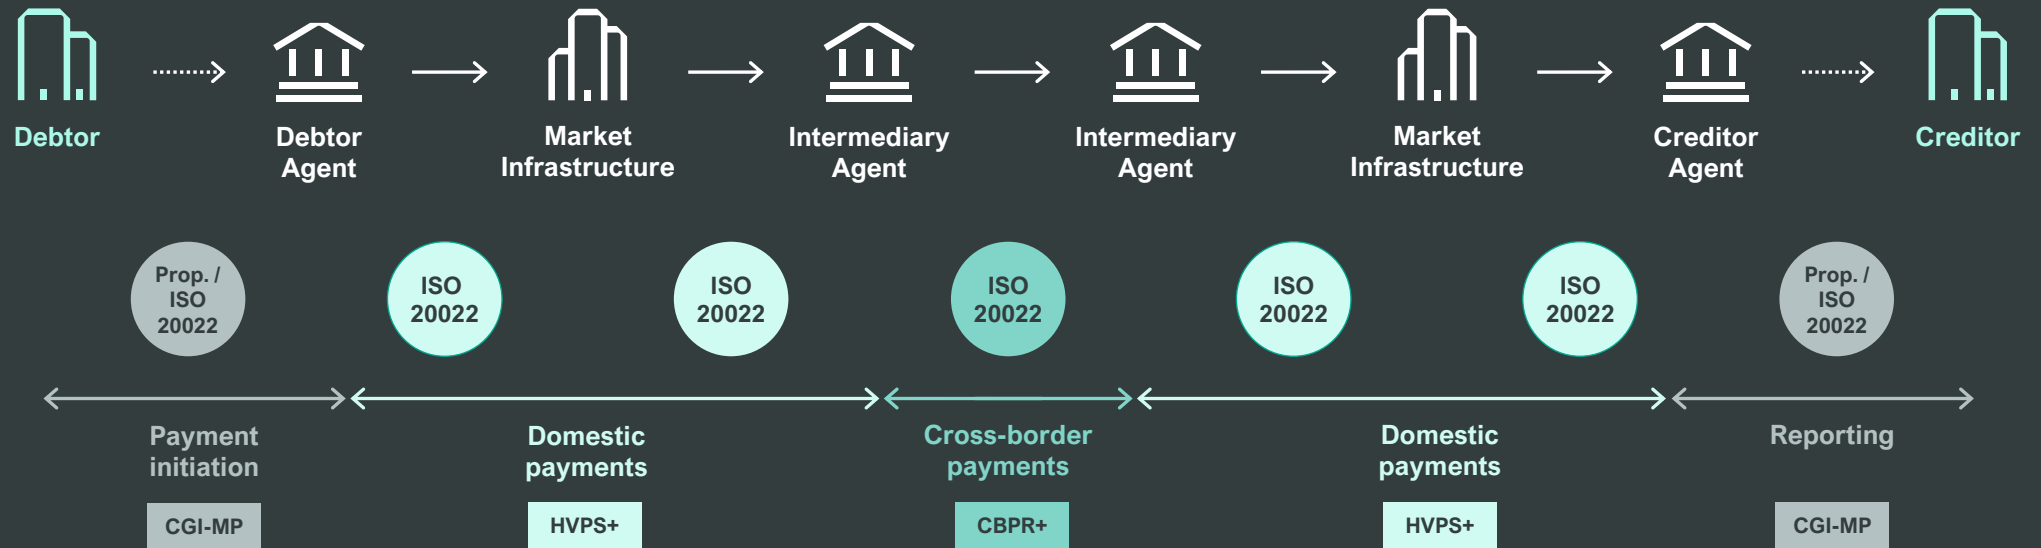

## Domination in high value payments

By 2025, ISO 20022 will dominate high-value payments, supporting over 80% of transactions values worldwide.

## Innovation

ISO 20022 adoption will enable new payment models like CBDCs, allow interoperability of IPS schemes and support new payment instruments like Request to Pay.

# ISO 2022 provides consistent, rich and structured data across the payments chain

- 40% of cross-border transactions have at least one ISO 2022 domestic leg, typically at the beginning and/or at the end
- 10-50% of RTGS payments have at least one ISO 2022 cross-border leg

- By the end of the decade more than 80% of PMI's will adopt ISO 2022 domestically hence end-to-end STP remains highly dependent on PMI development maturity and local market practice
- Global Swift initiatives like gpi, ISO 2022 & PMI services are already reducing friction and increasing speed of transaction value chains

# What improvements does ISO 2022 bring over MT?

June 2024  
ISO 2022  
Community  
Readiness Deck

## Element hierarchy

- Nested elements for logical grouping of data
- For example, Creditor comprises of:

## Dedicated elements

**MT103, Single Customer Credit Transfer**  
**50K Ordering Customer**

```
:50K:/122267890
BIODATA GMBH
HOCHSTRASSE, 27
8022-ZURICH
SWITZERLAND
```

**paces.008 v8, FI to FI Customer Credit Transfer**

```
Debtor <Dbtr>
<Nm>BIODATA GMBH</Nm>
<PstlAdr>
  <StrtNm>HOCHSTRASSE</StrtNm>
  <BldgNb>27</BldgNb>
  <PstCd> 8022</PstCd>
  <TwnNm>ZURICH</TwnNm>
  <Ctry>CH</Ctry>
</PstlAdr>
</Dbtr>
```

## Enhanced data model

- Extensible financial language that accommodates local practices and their variants
- For example:
  - Accounts identified by sub-elements such as **IBAN** or **Other**
  - Codes identified as **Proprietary** or as an ISO recognized **Code**, which may be defined externally to the message
  - Agents and party identification includes **LEI** and more granular **Postal Address**

## New elements

- Enabling On Behalf Of (OBO) payments for example using **Initiating Party** field to capture details of party initiating credit transfer on behalf of Debtor
- Structured **Remittance Information** can include rich invoice information to support reconciliation for the Creditor
- Dedicated instruction elements allow instructions for specific parties, such as **Instruction for Creditor Agent** and **Instruction for Next Agent**

# Supercharge your payments business with ISO 20022

[Visit the mini-hub on swift.com](#)

June 2024  
ISO 20022  
Community  
Readiness Deck

Leading financial institutions share their insights on real-world benefits of ISO 20022's rich and structured data.

## Run your business

### Streamline financial crime compliance

Use the structured data in the ISO 20022 format, improve efficiency and free up operational teams to focus on real risks.

### Improve exceptions and investigations

Increase operational efficiency, reduce costs and improve SLAs.

### Simplify regulatory reporting

Improve customer experience, reduce operational and processing costs.

## Grow your business

### Enhance customer insights

Tailor products and services to specific customer groups.

### Build vertical value propositions

Protect your existing business, gain access to new customer segments and revenue streams.

### Strengthen corporate treasury activities

Reduce payments friction, streamline reconciliation, increase the accuracy of cash flow forecasting, and improve working capital.

## The time to act is now

[Visit the mini-hub on swift.com](https://www.swift.com)

June 2024  
ISO 2022  
Community  
Readiness Deck

Standards coexistence is now a reality. But before the full benefits of ISO 2022 can be realised, financial institutions need to adopt it natively and at scale.

Major reserve currencies are already in the process of adopting ISO 2022, so it's essential that you are ready to receive, relay, acquire and initiate payments using the new standard.

There are many ways that you can use ISO 2022 to improve the efficiency of your operations, reduce costs, improve customer experience, create new value propositions, and gain market share.

Forward-thinking financial institutions are already taking advantage of these opportunities.

Whatever your business goals, start making ISO 2022 part of your strategy today to reap the rewards of rich and structured data and supercharge your business.

- Prioritise your business case based on the examples that can offer the greatest benefits for your organisation
- Consult with your internal colleagues to discuss the opportunities presented by ISO 2022
- Start working with your partners and corporate customers to plan their adoption journey

# In-flow vs Transaction Manager

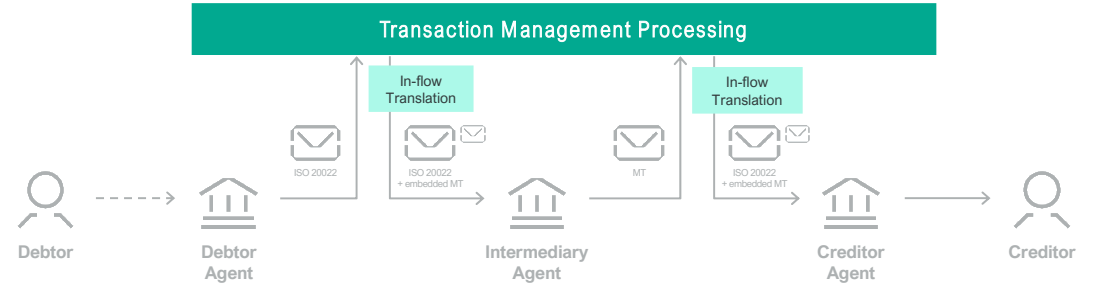

June 2024  
 ISO 2022  
 Community  
 Readiness Deck

Transaction Manager and In-flow Translation are two **independent** services directly embedded into current messaging services.

- 1 Debtor Agent sends ISO 2022 to Intermediary. Message is internally routed to Transaction Manager, which creates transaction copy and delivers ISO 2022 to Intermediary
- 2 Intermediary receives ISO 2022 + embedded MT added by In-flow translation after TM processing
- 3 Intermediary sends MT (same UETR) internally routed to TM. TM converts to MX, applies data integrity rules, updates transaction copy and delivers ISO 2022 to receiver
- 4 Creditor Agent receives ISO 2022 + embedded MT added by In-flow translation after TM processing

# In-flow vs Transaction Manager

June 2024  
 ISO 20022  
 Community  
 Readiness Deck

	In-flow Translation	Transaction Manager
<b>What?</b>	Translates ISO 20022 messages into a multi-format message in which a translated MT message format is embedded. The receiver can choose for the output message to be the untranslated ISO 20022 message or a multi-format message	Processes in scope messages, stores a centrally maintained transaction copy, holds all transaction information for all parties and ensures the transaction data is preserved across the entire lifecycle
<b>How?</b>	Follows mapping rules defined by the CBPR+ working group and is agnostic of the content	Uses process-based and data-based logic to look at data quality, applying business validation and data integrity rules to the transaction
<b>Scope</b>	All <u>eligible in-scope messages</u> will be processed by in-flow, <b>unless an institution decides to opt out</b>	All eligible in-scope messages will be processed by Transaction Manager, there is <b>no opportunity to opt out</b>

As Transaction Manager output is an ISO 20022 message, all messages processed by it can be subject to In-flow Translation

# Impact of ISO 20022 on Financial Crime compliance operations

Consult the [ISO 20022 screening guidelines](#) document on swift.com

June 2024  
ISO 20022  
Community  
Readiness Deck

## Benefits of ISO 20022

- ISO 20022 creates opportunities to increase efficiency and effectiveness in your Financial Crime compliance processes
- ISO 20022 provides additional and more structured data elements to better identify names, addresses as well as different party fields involved in the transaction
- **To take full benefit of ISO 20022 you need to:**
  - Work with with your compliance department to check how additional data elements can improve your existing processes
  - Engage with your compliance vendor check how and when they will support ISO 20022

## ISO 20022 support on Swift Products

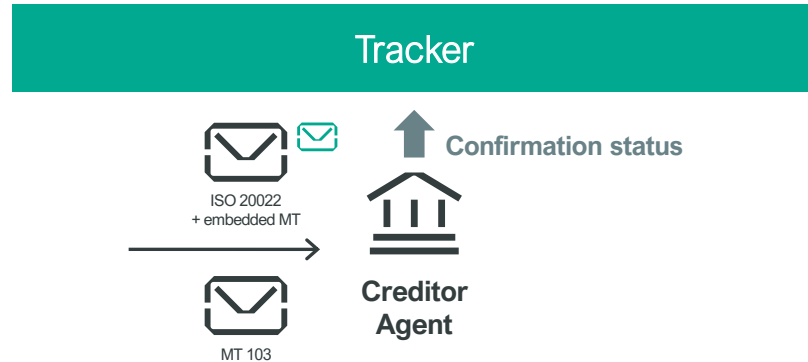

1. Swift's screening and anomaly detection solution – **Transaction Screening** and **Payment Controls**, are fully ISO 20022 ready
2. During the CBPR+ migration, you must be ready to screen at least incoming ISO 20022 CBPR+ MX messages
3. Review your configuration to ensure that you have appropriate rules in place to screen ISO 20022 messages
4. Test the impact of ISO 20022 on your sanction's compliance processes with Swift Sanctions Testing

Consult the [ISO 20022 screening guidelines](#) document on swift.com  
[Use case 1 – Streamline financial crime compliance | Swift](#)

For more information on how to set up ISO 20022 screening configuration, see the [Transaction Screening Support Page](#) and [Payment Controls Support Page](#)  
More information on [Sanctions Testing](#)

# Universal Confirmation and ISO 2022 Adoption

For **every** Customer Credit Transfer received, **you must send** a confirmation status to the Tracker\*

What?	How?
Customer Credit Transfer includes <b>MT 103</b> , <b>pacs.008</b> and <b>multi-format MX</b> messages received	You can use the channel and format of <b>your choice</b> to send a confirmation status

**Observer** will calculate your **compliance** based on your combined performance across **FIN and FINplus**

(\*) Universal Confirmation Rulebook was introduced in 2020

## Migration Checklist

- **Consult** the latest Universal Confirmation Rulebook available
- **Test** your confirmation capabilities within your own institution
- Reach out to **Swift Support** in case you have any questions to ensure your confirmation process is **ready** for receiving pacs.008 and multi-format MX messages
- Consider including the **migration** of your MTs 199 to trck.001.001.02 or API in your **migration plan**
- **Deprecated support for MT199/299**. New functionality available only on API or trck

# Vendor readiness

Is your partner CBPR+ ready? – Swift

## Swift

## What you can do

Self-attestations have been renewed for all vendors describing their solutions for CBPR+ since 31st March 2024.

This renewal of CBPR+ self-attestation did ensure the vendor solutions are compliant with the most up to date CBPR+ usage guidelines.

Swift is looking to enforce a mandatory criteria for CBPR+ self-attestation to further enhance CBPR+ ready listing.

Engage with your vendors as soon as possible

Check that your vendor solution is compliant with the most up to date **CBPR+ usage guidelines** – check the self-attestation date on the CBPR+ ready listing.

Ensure your CBPR+ ISO 20022 **implementation roadmap** is line with your **vendor's roadmap** for being CBPR+ ready.

Let us know if your **vendor's timelines** for CBPR+ implementation **are stopping you from your own ISO 20022 adoption**.

## Market Practice Guidelines on the usage of rich and structured data elements for cross-border payments

Readiness Deck

Updated October 2023, following start of coexistence and completion of Transaction Manager ramp-up

*“With Transaction Manager safeguarding the end-to-end data integrity, customers can now leverage the full potential of ISO 20022 and start sending ‘enhanced’ data”*

[Link to full document](#)

Set of papers published from November 2023 onwards

Guidelines on the provision of

- Ultimate Parties
- Regulatory Reporting
- Structured Remittance Information
- Hybrid Postal Address (unstructured Postal Address not allowed after November 2026, i.e. NAK on network)

[Link to full document](#)

# Introduction of hybrid (semi-structured) postal address option across CBPR+ messages for all parties and agents

Visit KB article 5026188 for more details

PREFERRED

### Fully structured

- All available address data is mapped into one of the 14 ISO 20022 fields
- No co-mingling of data
- No combination with “AdrLine” allowed

### Unstructured

- No combination with structured ISO 20022 address elements allowed
- Difficulty to interpret data due to co-mingling of address elements
- MT unstructured (Debtor and Creditor):
- :50F:/GB12CITI08330078493433  
1/ERIC STOWERS  
2/GRANGE ROAD, 50  
3/GB/LONDON, SNW28 1EU
- :59F:/GB12MID40051587235467  
1/DESK SUPPLIES PLC  
2/MILL ROAD, 48  
3/GB/LONDON, SE 58 76E

NEW

### Hybrid (semi-structured)

- Combination of structured ISO 20022 address elements and **up to 2 lines** of 70 characters of unstructured “AdrLine” allowed
- Elements available in structured format **must be mapped** into the respective structured element (minimum: TownName & Country)
- Structured elements **must not be repeated** in the AdrLine element(s)
